

FR-1x Fixed Bellows Instructions

Dale Mathis Accordion

1 Turn on accordion

2 PUSH and HOLD Blue SET/SHIFT button (see AUd in screen)

3 Push Reg. #4 button 28 times (see bLC in screen) This is the Bellows Curve adjustment.

This chart can be seen on page 43 of owner manual.

4 PUSH Reg. #1 (see 6 in screen) 6 is the standard bellows setting.

5 PUSH Reg. #1 Four times (see 2 in screen) 2 is the Fixed Medium bellows setting.

The chart for all bellows settings can be seen on page 49 of the owner manual.

6 PUSH Blue Set/Shift button quickly to exit editor and return to normal playing function.

In FIXED mode the bellows straps can remain closed. Use the Master volume control to adjust the volume. Orchestra sounds – like piano, banjo, mandolin will still respond to volume changes depending upon how hard you strike the keys. Accordion and Organ sounds will play at a steady volume no matter how you strike the keys.

The FR-1x can remember the FIXED bellows setting when the accordion is turned off. Please turn to Page 45 of the manual for the three step process to SAVE your setting. If you do not save it, you have to repeat the operation each time the accordion is turned on.
