Back Up FR-4x Set Memory & User Program Memory – Dale Mathis

1 Find a USB stick that works. If you can record a song, it will work for this process. The smallest GB size is best. (2GB – 16 GB). Do not use Scandisk brand. Delete all other files on stick if it has been previously used. Insert stick into USB port then turn on accordion.

2 Menu/Write – see Acc Edit in screen

3 > button 12 times – read Utility in LCD screen

4 Enter/Yes – see copy SET in screen

5 > button 7 times – Export in LCD screen

6 Enter/Yes – Type SET in screen

7 > 18 times – Write? N Y in screen

8 Enter/Yes

9 If Over wr? Appears, push Enter/Yes (see Exporting, then Type SET in screen)

10 + button 1 time – see Type UPG in screen

11 > button 18 times – see Write? N   Y

12 Enter/Yes – see percentages, then complete.

13 Turn OFF accordion. Remove stick. Label stick. Do not use this stick for other programs.

If screen does not show the messages written above as you do this process, you have made an error. Turn off accordion and restart the process.
